

Lie Algebras IV 2008

Final handout and exam information

1. What is on the exam: Notice that there is material in the last weeks that has not been covered by an assignment. This is examinable. I will hand out a mock exam which will be essentially the 2007 exam. The 2008 exam will be very similar to this in format. So 5 questions each worth approximately 20 marks. The first question will be true and false.

2. Check recorded assignment marks: Please check the assignment marks I have recorded below and come and see me if there is a problem.

3. Assessment: There were 4 assignments and there will be a final 3 hour exam. The final mark is calculated as follows. Let e be the mark for the exam out of 100 and a the mark for the best 3 assignments out of 20 then the final mark out of 100 is:

$$\max \left\{ e, \frac{80}{100}e + a \right\}.$$

4. Exam location and time: The exam is at Wayville. You can find the time on the University web page at <http://www.adelaide.edu.au/student/exams/examtt.htm#h> under 'Honours Pure Mathematics Part 1 - Lie Algebras'.

5. Revision Lecture: Don't forget the revision lecture on Friday 13th at 11.00 am in the School Board room.

6. Contact details. Remember can find me on Level 4 of 10 Pulteney St in Room 419. The phone there is 8303 4174 and my email is michael.murray@adelaide.edu.au.
